(54) Title: FILM CARRIER TAPE FOR MOUNTING ELECTRONIC COMPONENT

(54) 発明の名称: 電子部品実装用フィルムキャリアーテープ

(57) Abstract: A film carrier tape for mounting electronic components having a large number of wiring patterns of a conductive metal formed on the surface of a long insulating film, characterized in that each wiring pattern is covered independently with a solder resist layer except for the part of connecting terminal, and the solder resist layer formed on the surface of each wiring pattern is divided into a plurality of sections. Warp can be reduced in the film carrier tape for mounting a large number of electronic components cut in the widthwise direction as with the case of CSP, COF, BGA, or the like.

(57) 要約: 本発明の電子部品実装用フィルムキャリアーテープは、長尺の絶縁フィルムの表面に導電性金属からなる多数の配線パターンが形成されてなる電子部品実装用フィルムキャリアーテープにおいて、該それぞれの配線パターンが、

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
